USPS Pricing Engine Web Services

September 23, 2019

Summary

This is the Pricing Engine SDK (version 11.7.6.0) for the September 27, 2019 Release. The following is a list of enhancements included in this release.

Defect - The Dimension Text for GXG to Country 10032 is incorrect

Summary

The dimension text for the GXG product going to Country 10032 was missing the max length and width.

Changes

Updated database to correct the issue.

Defect - UPUXIT L+G and L+W+H are not being returned

Summary

The Length + Girth and Length + Width + Height supplied by the UPUXIT Web Service was not being parsed correctly by the Rate Engine code.

Changes

Updated code to correctly parse the data

Impact on Existing Applications

You should rebuild your application since the WSDL has changed.
